Although most often thought of as parents eating live young, filial cannibalism includes parental consumption of stillborn infants and miscarried fetuses as well as infertile and still-incubating eggs. Vertebrate examples include pigs, where savaging accounts for a sizable percentage of total piglet deaths, and cats.

Cannibalism - Wikipedia

The examination of the story of what happened on the Arrogant constitutes another example that supports the case of historians who currently claim that the atrocities committed by the slavers were more common than what we have thought thus far. It also raises the question of why the slavers would sacrifice whom they hoped to sell upon their arrival in Cuba.

Cannibalism involves eating other humans, which is not nice, but even worse, it can kill you, too. Human beings have been eating each other for a long time, with mixed consequences. The first known case dates back 100,000 years, when Neanderthals in France ate their kind, according to the BBC. There were 15,000-year-old remains, both adult and child, found in a cave near Bristol in England that show signs of cannibalism: 'They de-fleshed and disarticulated the bones, then chewed and ...
