Perception in architecture and the environment, which is the main concern of this thesis, can be counted as one part of the whole subject of perception. However, currently there is a great lack of application and utilisation of knowledge of that field. One can say that dissatisfaction with undesirable results in the design of our environment and with its design courses, were the main motive ...

Abstract. The character of urban space is being recreated by changes, which are taking place very fast. Especially buildings that are a part of the complementary development have an important influence on its composition. With the penetration into the historical and compact urban fabric, the complementary buildings are transforming the face of well-known places that often have a rich history which was permanently inscribed in the memory of the inhabitants of many generations.

Mary Ben Bonham Miami University, Oxford, Ohio ABSTRACT: How architects measure light is changing. Human perception of light is ostensibly the reason why spaces are illuminated, yet primary lighting guidelines used by architects measure how much light is falling on a surface, not the distribution of light to the human eye (Cuttle 2011). Recent lighting research related to human visual perception introduces new ideas that, while they challenge the status quo of lighting practice, build on ...

The visual perception of this town is reflected in its architectural elements. Silva (2006) argued that given the limited visual perception of historic towns, particularly on their physical elements, special preservation programs must be launched to improve the image of these areas. Therefore, an empirical study on the historic town of Kumbakonam must be performed to understand the significance of the architectural elements of their built heritage.
