Periodic Tales: A Cultural History of the Elements, from Arsenic to Zinc is a 2011 popular science and history book by English writer Hugh Aldersey-Williams, on the history and cultural associations of the chemical elements. The book is divided into five sections, "Power", "Fire", "Craft", "Beauty", and "Earth", which group elements according to their primary cultural connotations, rather than their position on the periodic table.

~~Periodic Tales - Wikipedia~~

Hugh Aldersey-Williams's Periodic Tales tells the story of the cultural history of the elements separated in five topics, the subjects of the book which are: power, the richness of the element or how valuable it is; fire, the changes of compounds when they react with other compounds like water; craft, the way people can manipulate the elements; beauty, the appearance of an element and how elements color our world, and earth, how an element affected a certain place or how the place affected an el
