Socket extension. Php comes with a socket extension which provide c-style socket functions and can be used to write socket programs. However the socket extension is not the only option to do socket programming in php. Another technique is to use streams, like file streams. First lets take a look at how the socket extension code looks like.

UDP Sockets in Php In a previous article we learnt about writing simple server and clients using TCP sockets in php. In this article we are going to use udp sockets for the same. UDP sockets are much simpler to work with since they are connection-less. A udp server just has an socket that waits... [Read More »](#)

Socket Programming Socket programming involves connecting to remote machines on LAN or over the internet using ip addresses and port number. For example google.com has an ip " 173.194.36.3 " and runs http server on port 80. So a socket application can connect to that ip address on that particular port number and start data communication ...

Simple Client-Server socket program in PHP. Hi Ankur.Saxena17, i want to know can we develop one service file like service.php in ubuntu and client.php in windows and from web page of client.php in windows can i access the service functions written in service.php file from ubuntu through TCP/Ip programming in .Net we have WCF for this but in php i am not getting how to create it please help

### Socket Programming in PHP - CodeProject

1. Create a socket. The socket function can be used to create a socket. In the following code example we shall create a tcp socket. `#!/usr/bin/perl -w use Socket; # For constants like AF_INET and SOCK_STREAM $proto = getprotobyname ('tcp'); #get the tcp protocol # 1. create a socket handle (descriptor) my ($sock); socket ($sock, AF_INET, SOCK_STREAM, $proto) or die $!;`

Note that `socket_bind()` must be called before `socket_connect()` or `socket_listen()`. Listen for connections. After binding a socket to a port the next thing we need to do is listen for connections. For this we need to put the socket in listening mode. Function `socket_listen()` is used to put the socket in listening mode. Just add the following ...

### Socket Programming using PHP

In this Python 3 tutorial video, we cover the socket module. The socket module is a part of the standard library, so no installation is required. Sockets are an integral part for networking, but often confusing. I am by no means an expert on sockets, but I can at least share the knowledge I have on them.

### Python 3 Programming Tutorial – Sockets intro | E-tutorial

In this Python 3 Programming Tutorial, we cover the use of sockets to pass data around. Here, we have a server, which binds a socket and listens on the port we specify. Then, we are able to use telnet and communicate with our Python script, which takes our data, digests it, and replies.
