Chemistry Thermodynamics Problems And Solutions File Type

water is -237 kJ / mol , calculate the potential for the formation of hydrogen and oxygen from water. To solve this problem we must first calculate ΔG for the reaction, which is $-2 (-237 \text{ kJ / mol}) = 474 \text{ kJ / mol}$. Knowing that $\Delta G = -nFE^{\circ}$ and $n = 4$, we calculate the potential is -1.23 V .
