~~Of Energy Study Guide~~ Answers

According to the law of energy conservation:

Energy can neither be created nor destroyed; however it can be converted from one form of energy to the other. Also, we know that energy is conserved in elastic collision.

Obviously, a loss in energy during a

Download Free Physics

collision will imply that the collision was inelastic.

~~Experiment to Study Conservation of Energy~~

The law of conservation of energy is a very important law in thermodynamics study in Physics. According to it energy can neither be created nor be destroyed. But we may

Download Free Physics

transform it from one form to another. If we take all forms of energy into consideration, then the total energy of an isolated system always remains constant.

Study.com

Concepts of work, kinetic energy and potential energy are discussed; these concepts are combined with the work-energy theorem to provide a convenient means of analyzing an object or system of objects moving between an initial and final state.
