some health benefit. Carotenoids are one type of phytochemical. Phytochemicals also include indoles, lignans, phytoestrogens, stanols, saponins, terpenes, flavonoids, carotenoids, anthocyanidins, phenolic acids, and many more.

Phytochemicals—Human Nutrition

The health effects attributed to the consumption of phytochemicals are primarily due to the synergistic actions of bioactive dietary components which include micronutrients and phytochemicals. It is largely accepted that the additive effects of the combinations of various phytochemicals in whole plant-based foods are shown to have stronger protective actions than single, isolated phytochemical compounds.¹¹
