Master of Project | 2020 Sample PMP Earned Value ...

Below are some sample PMP questions based on EVM, Q1. You are the project manager on a project that has \$800,000 software development effort. There are two teams of programmers that will work for six month for a total of 10,000 hours. According to the project schedule your team should be done with 38% of the work.

Sample PMP Questions of Earned Value Management with ...

Solved: Cost Performance Index = (Earned Value)/(Actual Cost) $CPI = EV/AC$. According to the question: Earned Value = 25% of 100,000 = 25,000. Actual Cost = 30,000. Therefore, $CPI = 25,000/30,000 = 0.833$. Hence, the answer is "B". Here's how to study for this type with 2 key factors: Make sure you know the purpose of every component of the formula.

FORMULA based questions for PMP exam - Tech Agilist

Earned Value Management. Your project is expected to run for three consecutive years. Your organization is introducing earned value management as part of the planning and managing of this project. The project budget 100.000 \$. The budget is consistent across the three years.

PMP Exam Question 11; Earned Value Management - OpenPM.org

The reason is that a lot of numerical questions are based on the earned value formula in the PMP exam. When you use the earned value formula, you are measuring and analyzing how far off your project is from your plan and this helps you to measure the performance of project management processes. If you get a good hold of concepts and earned value formula, then it gives you the advantage to pass the exam in the first go.
