Solve for the sum of years. Sum of years = $(n / 2) (n + 1)$ Sum of years = 15 years. b. Solve for the total depreciation up to the third year. Total depreciation = $(FC - SV) (5 + 4 + 3) / 15$ Total depreciation = $(1,500,000 - 500,000) (12) / 15$ Total depreciation = Php 800,000.

Methods-of-Depreciation-Formulas-Problems-and-Solutions----

SOLVING ENGINEERING ECONOMICS PROBLEMS. The techniques presented so far illustrate how to convert single amounts of money, and uniform or gradient series of money, into some equivalent sum at another point in time. These compound interest computations are an essential part of engineering economics problems. The typical situation is that we have a number of alternatives: the question is, which alternative should we select?
