The 1955-up Pontiac V8 was an overhead valve engine with cast iron cylinder heads and block and wedge-shaped combustion chambers. An innovative design feature was mounting the rocker arms on ball pivots on studs set into the cylinder head, rather than using a separate rocker shaft. Along with being cheaper to build, this allowed more consistent valve action with less weight than a conventional shaft.

Pontiac V8 engine - Wikipedia

L925 - Pontiac V8 Engine Factory Casting Number And Code ...

March 29, 2017 by Pontiac DiY. The Pontiac V-8 block is constructed of cast iron, and though its displacement increased from 287 to 455 ci by enlarging bore and lengthening stroke over the years, the external dimensions didn't waiver far from the original design. A number of changes occurred during the course of its production run, however, and some limit component interchange.

REBUILD PONTIAC V-8: FACTORY PARTS GUIDE • Pontiac DIY

Pontiac Motor Car Company became Pontiac Motor Division (PMD) in the early 1930s and developed a 268-ci "Straight-8", which was quite reliable. V-8 Development. In 1954, General Motors leaned heavily on Chevrolet and Pontiac to develop V-8 engines for the 1955 model year and provided them with all available resources to ensure success.

Pontiac V8 Engines Factory Casting Number and Code Guide ...

Engine displacement can also influence it. Larger engines tend to pull the power range downward, so a particular manifold that produces greatest average power from 3,000 to 6,000 rpm on a 400-ci, may work best from 2,500 and 5,500 on a 455-ci. Intake manifolds can be classified into two distinct types, and it's directly related to plenum style.

Pontiac V-8: Intake Manifold Performance Guide

Casting codes for 1955 to 1963 are found on the passengers side of the block. Casting codes for from 1964 to 1967 are found on the distributor pad, except the 421's. Casting codes for from March 1967 on are found on the rear of the block just behind the number 8 cylinder. Casting #. Year.

Pontiac engines have block code. This code will tell you the year it was to be used. However, these codes were used over from year to year. Together with the casting code and casting date you can determine where what the engine is. Starting in 1965 Pontiac began using a 2 digit letter code.

Engine Codes – Pontiac Power Net

The Pontiac 400ci engine arrived in '67, followed in 1970 by the Pontiac 455 crate engine. At Golen Engine, we build both – as stock restoration builds for those wanting originality and as hot rod builds for people wanting more ponies. We also build a 434 for those who desire something a little less commonplace. Don't look for Pontiac ...

Pontiac Performance Crate Engines | Golden Engine Service

The Engine for 1961-1963 Pontiac's standard big car engine: the 6,374 cc 389V8 was cut in half. The right cylinder bank yielded a unique 45° inclined 4-cylinder engine, which was named the "Trophy 4" engine. So this was a 194.5 cubic inch (= 3,187 cc) four cylinder engine. Tempests got three versions of the engine:

The Pontiac 194 - 4 BANGER - a history lesson | The H.A.M.B.

We build them all, from 1955-1979, factory restorations, mild street engines to high power race engines. All engine sizes welcome, from 326, 350, 389, 400, 428, 455's and everything in-between. This includes all five Ram Air engines, Super Duty engines, and H0 Pontiac engines too. If Pontiac built it, we can build it, and better!

Pontiac engine builder - DCI Motorsports

Because auto-racing organizers classified cars based on horsepower, the factory rated the engine at 410 horsepower, but performance figures suggested the true number was closer to 500. With John DeLorean whispering in his ear, Mr. McKellar designed an overhead-camshaft 6-cylinder for the compact Pontiac Tempest.
