[PDF] Practical Software Testing: A Process-Oriented ...

Depending on the Software Testing Process that is followed, there are two major types of Software

Testing. These are discussed below. 1) Structured Software Testing. This is the kind of Software Testing wherein the tests and test cases are derived from a thorough knowledge of the structural code of the

Software and its Internal Implementation. Since it directly deals with the knowledge of the code, it is mostly undertaken by a trained team of developers.

2) Unstructured Software Testing

Software Testing Process – What happens in software Testing?

Software Testing Process #1: Test Strategy and Test Plan Every project needs a Test Strategy and a Test Plan.

These artefacts describe the scope... #2: Test Design Now that you have a strategy and a plan, the next step is to dive into creating a test suite. A test... #3: Test Execution You can ...
