4 2 Relations And

Functions

Waycoolalgebra

Preparing the

practice 4 2

relations and

functions

waycoolalgebra to

entre all daylight is

gratifying for many

people. However,

File Type PDF

Practice 4 2

there are still many

people who

moreover don't in

imitation of reading.

This is a problem.

But, subsequently

you can support

others to

Practice 4 2

Relations And

Functions

Waycoolalgebra

For example, $(4, 7)$

File Type PDF

Practice 4 2

is an ordered-pair number; the order is designated by the first element 4 and the second element 7. The pair $(7, 4)$ is not the same as $(4, 7)$ because of the different ordering. Sets of ordered-pair numbers can represent relations or functions.

Relation. A relation

File Type PDF

Practice 4 2

is any set of
ordered-pair
numbers.

Practice 4 2

Relations And

Functions

Waycoolalgebra

File Type PDF

Practice 4 2

Relations and

Functions Let ' s

start by saying that

a relation is simply

a set or collection

of ordered pairs.

Nothing really

special about it. An

ordered pair,

commonly known as

a point, has two

components which

are the x and y

coordinates. This is

File Type PDF

Practice 4 2

an example of an
ordered pair.

they must be
converted to

Waycoolgebra
Practice 5-2

And now let's draw
the actual

associations. So

negative 3 is

associated with 2,

or it's mapped to 2.

So negative 3 maps

to 2 based on this

ordered pair right

over there. Then

File Type PDF

Practice 4 2

we have negative 2
is associated with
4. So negative 2 is
associated with 4
based on this
ordered pair right
over there.
