Step 1: A problem

involving work can be solved using the formula

, where T = time

working together, A =

the time for person A

working alone, and B =

the time for person B

working alone. In this

Combined labor problems, or work problems, are math problems involving rational equations.

These are equations that involve at least one fraction. The problems basically require finding unit rates, combining them, and setting them equal to an unknown rate.
