(PDF) International Supply Chain Case Study

Understanding the difference between procurement and supply chain management is crucial, as these terms are not interchangeable but they often get mixed up. Procurement is the process of acquiring the goods your company needs for its business model. Supply chain management is the process of turning those goods into products and distributing them to customers as efficiently as possible.

Procurement vs. Supply Chain Management: What's Different?

Proper SCM covers the overall supply chain process and will create an efficient system that lowers costs, boosts profits, and promotes collaboration between all parts of the supply chain. This includes identifying company needs, financing purchases, strategic sourcing, negotiating price, quality control, inventory control, managing of transportation companies during both receiving and sending, etc.

7ENT1069 Procurement and Supply Chain Management

The objectives of a world-class procurement organization move far beyond the traditional belief that procurement's primary role is to obtain goods and services in response to internal needs. To understand how this role is changing, we must understand what purchasing is all about, starting with the primary objectives of a world-class purchasing organization.
