Download File PDF Pruning An Introduction To Why How And When Pruning 1: Why Prune - Garden.com Why do we prune? We prune for plant health: Thin out plants to let more light into the center of the plant. Thin out plants to improve air circulation around the plant, making it less susceptible to pests and diseases. Remove diseased branches. Page 9/26

Pruning An Introduction To Why How And When

When pruning a small diameter branch, a sharp pair of 'by-pass' secateurs should be used as they will minimise the risk of tearing the wood and harming its ability to produce the callus tissue that will eventually cover the wounds. 'Anvil' type secateurs can crush the soft tissue around the wound slowing the growth of callus tissue.

Pruning - why, how and when Guide to

Why do I need to prune? Many ornamental shrubs and trees can be allowed to grow without regular pruning. However, occasionally you may need to restrict the size, remove dead or unsightly growth, increase vigour, improve the shape or keep the plant in a healthy state to produce flowers and/or berries.
