Quick start with

Python – Python

functions and return  
values Quick start

with Python –

Function which

# Read Book Python The

Completes a single value.  
This is an example of  
function which returns  
a single value.

Meaning, function  
account\_balance  
returns the state of  
our account (similar to  
ATM machines or  
mobile banking when  
we want to see our  
balance).
