\$480 Remote Hydraulic Kit for Kubota Tractors - 15 minute ...

Rear remotes are hydraulic quick connection points on the rear of your machine that allow you to easily add and remove your hydraulic implements as needed. These remotes are controlled by a hydraulic control valve. This hydraulic control valve, sometimes referred to as a rear remote valve, is typically connected to your hydraulic system in series with your loader valve via the power beyond.

Rear Remotes - Summit Hydraulics

There's two types of detents that you can have in a rear remote, and the first of those types will be a float detent, where you push the valve forward and you'll feel a pop and it goes over top of a detent ball, and holds the valve in a forward position. Now, when you pop into that detent, you're going into what's known as float, and when you're in the float position, essentially you're just opening this thing up so the oil can freely flow from one side to the next, without any kind of ...

Understanding rear hydraulic remotes - Messicks

In just 30 minutes, you can have a remote hydraulic kit installed, ready to run a top link, bucket grapple, log splitter, or any other hydraulic implement. This simple kit takes advantage of the loader valve already installed on your tractor, and adds a valve to select a third function.

Remote Hydraulic Kits for Kubota|Tractor Innovations

Our valve kits are powered by the power beyond port. The purpose of the power beyond port is to provide auxiliary power to attachments beyond the loader valve. Example: 3 point hitch, rear remotes, backhoe, etc. The majority of tractors / loaders will continue to supply fluid to the power beyond port at all times.
