theories/hypotheses. Research is aimed at truth. Evaluation is aimed at action.

Program Evaluation: Background and Methods

Evaluation is a set of research methods and associated methodologies with a distinctive purpose. They provide a means to judge actions and activities in terms of values, criteria and standards. At the same time evaluation is also a practice that seeks to enhance effectiveness in the public sphere and policy making.

Research Methods and Program
Evaluation Key Concepts: A ...

Program evaluation refers to the systematic, scientific, and rigorous investigation of a program ' s effectiveness. In education research, for example, such evaluations examine the goal attainment and outcomes of programs designed to promote student, teacher, and/or school performance.

Program Evaluation - SAGE Research
Methods

Evaluation is a research enterprise whose primary goal is to identify whether desired changes have been achieved. Evaluation is a type of applied social research that is conducted with a value, or set of values, in its “ denominator. ” .

Read Book Research Methods And Program

Evaluation research is always conducted with an eye to whether the desired outcomes, or results, of a program, initiative, or policy were achieved, especially as these outcomes are compared to a standard or criterion.

What ' s the Difference? Evaluation vs. Research

Program Evaluation Focuses on a Program vs. a Population Research aims to produce new knowledge within a field. Ideally, researchers design studies to be able to generalize findings to the whole population—every single individual within the group being studied. Evaluation only focuses on the particular program at hand.

Four Differences between Research
