~~Lennarth Petersson (Author of Rigging Period Ship Models)~~

~~The author's first book, Rigging Period Ship Models, was a triumph of clarity for those needing to decipher the complexities of the square rig and has now sold in multiple editions. This book does the same for fore-and-aft craft and deploys three typical eighteenth-century types – an English cutter, a three-masted French lugger, and an American schooner. Some 200 diagrams show clearly where each separate item of standing and running rigging is fitted, led and belayed.~~
