Golden Age of Science / The Sputnik Era. 1957 - 1976. An increase in the focus of science education was started by the Sputnik launch in Russia, because the United States were embarrassed to be so far behind in science education compared to the Russians. During this period of time, many national science programs were started in an attempt to encourage science education in the United States including the Biological Science Curriculum Study, Earth Sciences Curriculum Project, Introductory ...

History Of Science Education Timeline

The history of science and technology is a field of history that examines how the understanding of the natural world and the ability to manipulate it have changed over the millennia and centuries. This academic discipline also studies the cultural, economic, and political impacts of scientific innovation. Histories of science were originally written by practicing and retired scientists, starting primarily with William Whewell, as a way to communicate the virtues of science to the public. In the

History of science and technology—Wikipedi

The professional purpose of science education is to introduce students into the conceptual and procedural realms of science. It has been argued that history of science facilitates this introduction. But science education also has a wider purpose which is to help students learn about science – its changing methods, its forms of organization, its methods of proof, its interrelationships with the rest of culture, and so forth. Many, as above, have argued that this requires contextual and ...

History of Science in the Curriculum
SpringerLink

The discipline of the history of science (henceforth 'the history of science') concerns the history of the way nature has been manipulated, modelled and understood by different societies. Because the sciences deal with what are taken to be true statements about a natural world that exists independently of human activity, the subject of the history of science seems to resist being historicised in the same way as other topics.

History of Science—Articles—Making History

The history of the ASE can be found in two publications: Interpreters of Science by David Layton and, published to celebrate the 50th anniversary of the association, Advancing Science Education: the first fifty years of the Association for Science Education, Edited by Edgar Jenkins and Valerie Wood-Robinson.

Secondly, a distinction can be made between the history of school science education and the history of school science teaching. The former embraces a range of issues which, while influencing the practice of school science teaching, can be distinguished from it, e.g. the writing and use of textbooks, initial and inservice training, assessment and examinations.

Sources and problems in the history of school science teaching

The scientific approach was inaugurated in 1840 by Justus von Liebig of Darmstadt, Germany. His classic work, Die organische Chemie in ihrer Anwendung auf Agrikulturchemie und Physiologie (1840; Organic Chemistry in Its Applications to Agriculture and Physiology), launched the systematic development of the agricultural sciences.
