sleeping, physical problems. For the MBI, as well as for most authors, "exhaustion would be the key component of the syndrome." Unlike depression,

~~Burnout Self-Test Maslach Burnout Inventory (MBI)~~

The Maslach Burnout Inventory (MBI) is a psychological assessment instrument comprising 22 symptom items pertaining to occupational burnout. The original form of the MBI was developed by Christina Maslach and Susan E. Jackson with the goal of assessing an individual's experience of burnout. The instrument takes 10 minutes to complete. The MBI measures three dimensions of burnout: emotional ...

~~Maslach Burnout Inventory — Wikipedia~~

The Maslach Burnout Inventory is the gold standard for research purposes. Use of the full MBI allows for scores to be compared to results from previous studies of U.S. physicians (Mayo Clinic Proc, December 2015;90(12):1600-1613). The full MBI is 22 items long and therefore may not be practical in all settings.
