Now, we use the actual yield and the theoretical yield to calculate the percent yield.

Step 1: List the known quantities and plan the problem. Known.

The theoretical

yield is what you

calculate when you

do a calculation on

paper or before

you do a reaction

in a lab. The actual

yield will always be

less than the

setting, there's
always some
amount of error,
whether it's big or
small.
