rocks that are a combination of igneous rocks and sedimentary rocks. Metamorphic means “change.” In geology, when one rock breaks down and combines with materials from another rock (i.e., sediments of another rock) and then over a period of time between temperatures and

Answer Sheet Sedimentary Rocks Guided Study

Sedimentary petrography involves the classification and study of sedimentary rocks using the petrographic microscope. Stratigraphy covers all aspects of sedimentary rocks, particularly from the perspective of their age and regional relationships as well as the correlation of sedimentary rocks in one region with sedimentary rock sequences elsewhere.
