Self-esteem is a judgment or self-evaluation of our work or goodness and how well we feel we are doing in areas of our life that we rate as important (Yang, Xu, Chen, Shi, & Han, 2016). But while the definition is useful and intuitively valid, it soon becomes clear that self-esteem is a complex construct like many other psychological concepts.

Self-Esteem Research: 20 Most Fascinating Findings

Mruk's view that self-esteem is a critically important influence on psychological adjustment and quality of life is now an accepted tenet in personality theory. Lack of self-esteem is frequently a precursor to depression, suicidal behavior, and other personality disorders. Nonetheless, the clinical diagnosis of self-esteem problems has lacked the basis of an overarching theory. Dr. Mruk's comprehensive analysis distills the literature on self-esteem into practical and reliable treatment ...
