Ada is a structured, statically typed, imperative, and object-oriented high-level programming language, extended from Pascal and other languages. It has built-in language support for design by contract (DbC), extremely strong typing, explicit concurrency, tasks, synchronous message passing, protected objects, and non-determinism. Ada improves code safety and maintainability by using the ...

Ada is the programming language of choice for high integrity software systems and is used extensively in industries such as transportation and aerospace. This textbook is intended for experienced programmers (advanced students and practicing software engineers) who need to master software design and programming in Ada.

~~Ada for Software Engineers | Mordechai Ben-Ari | Springer~~

The second irony is that the Ada mandate, meant to force DoD software projects to catch up with progress in software engineering by retiring older approaches, has also had in the ensuing years the probably unintended effect of slowing down the adoption of newer (post-Ada) technology by the military-aerospace community. The lessons of Ada remain irreplaceable, and it is a pity that many of the O-O languages
