The environmental sciences are undergoing a revolution in the use of models and data. Facing ecological data sets of unprecedented size and complexity, environmental scientists are struggling to understand and exploit powerful new statistical tools for making sense of ecological processes. In *Models for Ecological Data*, James Clark introduces ecologists to these modern methods in modeling and ...

*Environmental Statistics  
Textbook - OIC-StatCom*

Presents research on practical applications of statistics to environmental science. Aims to advance statistics for environment, ecology and environmental health, and advance environmental theory and practice using valid statistics. Covers theory and methods, case studies and applications, statistical ecology, health statistics and stochastics, and more.
