~~Stilling The Brain: The True Patanjali Yoga (A Scientific Interpretation) by R.A.S Kocha. Description. Foreword. Yoga is perhaps the most popular four-letter word originating from Sanskrit in modern times. As an esoteric system of physical culture; as a panacea for all incurable diseases—physical and psychological—or as a pseudo-religious cult for “Seeing God”, Yoga has become the most fashionable fad in the modern world.~~

~~Stilling the Mind. As you go about your day, you may notice that your practice gets further and further away from your awareness. The mind goes on autopilot for hours on end. This can sometimes result in feelings of anxiety or rapid thinking. You can always use this practice of stilling the mind to help settle yourself back into calm awareness.~~

The first of the three brains is the obvious one. It is the head brain, and the master of processes such as thinking, perception, and cognition. It recognises things, makes meaning of them, creates narratives and masters language. Head based language sounds like this: "I think", "I reckon", or "I understand".

It consists of three distinct regions: the hindbrain, the midbrain, and the forebrain. Although the brain of higher vertebrates undergoes considerable modification during embryonic development, these three regions are still discernible. The hindbrain is composed of the medulla oblongata and the pons. The medulla transmits signals between the spinal cord and the higher parts of the brain; it also controls such autonomic functions as heartbeat and respiration.

Mindfulness practice has been implicated in the decreased activation and the stilling of our Default Mode Network (DMN), which is also sometimes referred to as our wandering "Monkey Minds." The DMN is active when our minds are directionless as it goes from thought to thought, a response that is sometimes likened to rumination and not always adaptive with regards to overall happiness.
