Reading in New Zealand is considered successful for most students. Gilmore, Lovett, & van Hasselt, (2003) in their PROBE findings, of the NEMP study of Year 4 and Year 8 students found that 80 percent of these pupils had the technical skills to read at or above levels regarded as normal for their time at school. When New Zealand is

## **STUDENTS' PERCEPTIONS OF READING**

The reading these students perceived as school reading differs from recommendations in the literature. In addition to considering these differences in the implications we draw for educators, we include suggestions about the usefulness of inviting students to draw and talk about the process of reading and to talk about their experiences of school reading.

The main lesson learnt is that the readiness of ESL students to pursue their studies in a UK university was questionable, but over time they demonstrated that they had learnt through different forms of interactions in academia. Sociocultural theory is used to explain the changes over time that students reported in their academic reading practices and difficulties. This study viewed reading as a social practice as students improved through their participation in academic activities.
