The TMC40m gearbox came with my new beata 25hp engine some 18 months ago and for some strange reason the gearbox is now faulty and difficult to find the forward gear, reverse is no problem. The original installer is somewhat mystified as only 100 hours on engine.

~~+ YBW Forum~~

The TECNODRIVE TMC 40P marine transmission is equipped with mechanically activated, servo-controlled tapered clutches; the gears have been specially designed to provide quiet operation, and the bearings are oversized.

~~Accesories — Gearboxes — TMC 40P~~

I am sure the TMC 40 is a hydraulic box so putting it in gear will not work. There are special tools that have pegs that fit into two of the bolt holes or perhaps use a very large set of stilsons on the coupling but the

Get Free Technodrive Tmc 40 Marine Gearbox Manual

tool would be more positive. Those nuts are usually very tight. maybe someone here has the torque setting required.

Twin Disc TMC 40 P will replace a Hurth HBW 50, HBW 100, or ZF5, ZF10 transmissions. Just unbolt your old transmission, and bolt this one in it's place. Unlike Hurth / ZF transmissions that use multi disc clutches, this Technodrive gear uses a simple cone clutch. This makes them VERY reliable, robust, and trouble free.

I have a Technodrive TMC 60 gearbox attached to a Vetus M4.17 that has done 800 hours in a 60 foot narrowboat. Whilst the engine is fine the gearbox I am not happy with as it insists on dropping out of gear and back again at low revs - with the usual accompaniment of vigorous "clunking". I've tried increasing the engine idle revs slightly but to no effect and the boat is then going too fast ...

~~Twin Disc / Technodrive TMC 40 P Service Manual — MTMC ...~~

It has a TMC40 gearbox on the back which looks to be factory fitted. There is a TMC40 manual on board which says to use SAE30/40 oil but the BD722 handbook says to use ATF oil, as does the technodrive web-site. The guys in Halfords have never heard of SAE30/40 oil nor can I source it anywhere else.
