Torque converter TF-81SC The main source of trouble for a TF-81SC owner is usually the torque converter and the valve body. And in most cases the problem is associated with transmission overheat and infrequent oil change. As a result of the modernization, the torque converter got equipped with additional shock absorbing springs.

Transmission AW TF-80SC / 81SC has a complex structure and fully operated by the automatic system, this was the only mechanical connection with the gearbox selector. So, the car owner must be careful when changing speed and modes of the transmission. A common cause of damage is the change of regime in a gear box in a moving vehicle.
