The string theory landscape or landscape of vacua refers to the collection of possible false vacua in string theory, together comprising a collective "landscape" of choices of parameters governing compactifications. The term "landscape" comes from the notion of a fitness landscape in evolutionary biology. It was first applied to cosmology by Lee Smolin in his book *The Life of the Cosmos*, and was first

The Cosmic Landscape: String Theory and Intelligent Design

The String Theory Landscape
The most recent update to the Big Bang theory, called the String Theory Landscape, arose out of elements of string theory and cosmic inflation. The theory's inclusion of a multiverse and its denial of immutable physical laws has raised debates that continue to this day. This story is part 1 of a five-part series.
