The Great Plague of London, lasting from 1665 to 1666, was the last major epidemic of the bubonic plague to occur in England. It happened within the centuries-long Second Pandemic, a period of intermittent bubonic plague epidemics which originated from Central Asia in 1331, the first year of the Black Death, an outbreak which included other forms such as pneumonic plague, and lasted until 1750.

Great Plague of London - Wikipedia

In 1666 the Great Fire of London destroyed much of the centre of London, but also helped to kill off some of the black rats and fleas that carried the plague bacillus. Bubonic Plague was known as the Black Death and had been known in England for centuries. It was a ghastly disease.

The Great Plague 1665 - the Black Death - Historic UK

Great Plague of London, epidemic of plague that ravaged London, England, from 1665 to 1666. City records indicate that some 68,596 people died during the epidemic, though the actual number of deaths is suspected to have exceeded 100,000 out of a total population estimated at 460,000.
