And it was an astronomer who finally explained what happened to the dinosaurs. Frans Johansson's The Medici Effect shows how breakthrough ideas most often occur when we bring concepts from one field into a new, unfamiliar territory, and offers examples how we can turn the ideas we discover into path-breaking innovations.

The Medici Effect (Harvard Business School Press, 2004) is an innovation classic that explores why the most powerful innovation happens at the "Intersection," where ideas and concepts from diverse industries, cultures, and disciplines collide. Innovation today is less about expertise and more about how you can rapidly combine insights and ideas, often widely disparate, to create surprising and unique breakthroughs.
