Overview of the new ISO 22000:2018 Standard*The New Iso Standard For*

The ISO 14155:2020 (Clinical investigation of medical devices for human subjects – Good Clinical Practice) is the third edition of this standard of reference for the design, conduct, recording, and reporting of medical device clinical studies. It provides guidance to manufacturers and clinical research professionals on how to implement Good Clinical Practice (GCP) for pre and post-market clinical investigations designed to determine the safety and performance of a medical device.

What You Need to Know About the New ISO 14155:2020 Standard

The new standard complements ISO 14008, Monetary valuation of environmental impacts and related environmental aspects, published in March 2019. It describes methods for valuing environmental aspects and impacts, providing the essential data that feeds into such cost-benefit analyses. Hence, the two standards dovetail with one another.

Calculating the value of the environment with new ISO standard
