One object into another. consumption is the use of products, usually measured as purchase of end of the production line goods and services. 747 views.

*What is the difference between production and consumption ...*

Consumption and household production. Aggregate consumption is a component of aggregate demand. Consumption is defined in part by comparison to production. In the tradition of the Columbia School of Household Economics, also known as the New Home Economics, commercial consumption has to be analyzed in the context of household production. The opportunity cost of time affects the cost of home-

However, even if actual seafood consumption develops closer to the lower bound, this suggests that in 2030 China would need a minimum of 6 Mt of additional seafood to cover projected demand (compare 66 Mt production in 2020 with 72 Mt lower consumption estimate for 2030, Table 1) (see Supplemental Experimental Procedures). The less-conservative assumptions about demand suggest a
