Investigative psychology is a relatively new area of applied psychology. Working within the criminal justice system, it is a specialist field within forensic psychology. Psychologists in this field work with the police to help solve crimes by understanding the types of crimes and criminals. Different uses of violence, for instance, can tell investigative psychologists what personality types to look for in solving a crime.

Our understanding of the potential pluses or minuses of erroneous vs accurate self-insight is, according to a recent review in *Advances in Experimental Psychology*, 'clouded' by all kinds of issues, including differences between studies in the way self-insight is measured, and also fundamental differences in types of self-deception. (Self-deception may sometimes stem from an individual's ...)
