The Science of Desire: The Search for the Gay Gene and the Biology of Behavior is a 1994 book by the geneticist Dean Hamer and the journalist Peter Copeland, in which the authors discuss Hamer's research into the genetics of homosexuality. The book received both positive and mixed reviews. It was praised as a well-written discussion of science that properly acknowledged the limitations of genetic research on homosexuality, usefully explored its ethical implications, and drew on a wide range of s
