The Transparent Society is full of such provocative and far-reaching analysis. The inescapable rush of technology is forcing us to make new choices about how we want to live. This daring book reminds us that an open society is more robust and flexible than one where secrecy reigns.

The Transparent Society: Will Technology Force Us To ...

In *The Transparent Society* (1998), David Brin overviews various threats to our privacy in an age with increasing information technologies and proposes a policy of open reciprocity transparency. Arguing against "strong privacy" advocates who oppose a transparent society (20), Brin argues that "'reciprocal transparency' may be our best hope to enhance and preserve a little privacy in the next century" (55).

The Transparent Society: Will Technology Force Us to ...

The *Transparent Society* is a non-fiction book by the science-fiction author David Brin in which he forecasts social transparency and some degree of erosion of privacy, as it is overtaken by low-cost surveillance, communication and database technology, and proposes new institutions and practices that he believes would provide benefits that would more than compensate for lost privacy. The work first appeared as a magazine article by Brin in *Wired* in late 1996. In 2008, security expert Bruce Schnei
