The Truth Machine is a science fiction novel by James L. Halperin about a genius who invents an infallible lie detector. Soon, every citizen must pass a thorough test under a Truth Machine to get a job or receive any sort of license. Eventually, people begin wearing them all the time, thus eliminating dishonesty in all parts of human interaction, and eliminating crime, terrorism and a great deal of general social problems.

The Truth Machine - Wikipedia

The eponymous truth machine helps create a perfect world where all crime and deception are steadily eliminated and everybody lives in bliss. I would have been more entertained if Halperin had shown the truth machine taking society in a completely different direction, revealing a hidden, sinister side or some bizarre characteristic (a la "1984").

What would you pay to know, right now, whether the person in front of you is telling you the truth? In a way, you might say that this information is priceless. It would utterly transform the way that we interact with one another. In 1996, author James Halperin wrote a wonderful book called *The Truth Machine* about precisely this possibility. Now, thanks to developments in video processing algorithms at M.I.T. over the last few years, that vision might be a lot closer than you might imagine.
