### *The Universe And Dr Einstein*

ASTRONOMERS have observed for the very first time the light from behind a black hole, proving in the process Albert Einstein's theory of general relativity "in action".

### *Einstein was right! Black hole discovery proves theory of general relativity 'in action'*

The telescopes captured a secondary flash, which is emanating from behind the black hole. Einstein predicted this phenomenon in 1916 in his theory of general relativity.

### *Astronomers discover light from back of black hole for 1st time*

Nothing escapes a black hole, not even light. The extreme light we see around these cosmic objects is formed at their edges from material falling in, power ...

### *For The First Time, Light Has Been Directly Observed From Behind A Supermassive Black Hole*

The researchers, led by Dan Wilkins of Stanford University, observed light from behind a supermassive black hole located in the center of a spiral galaxy called I Zwicky 1.

### *Astronomers observe light from behind a black hole for the first time*
