Verified Purchase. 'The Web of Life' is the book in which Capra defined his approach to ecology, thereby making ecology, or deep ecology, a concept that is part of a new science paradigm, powerfully introduced and promoted by one of the most important science theorists of our times.

WEB OF LIFE: A New Synthesis of Mind and Matter: Amazon.co . . .

In The Web of Life: A New Scientific Understanding of Living Systems, Fritjof Capra attempts to present a synthesis of systems models as a new (and improved) way of looking at life. While scientists will often speak of paradigm shifts within a field -- for instance from Newtonian to relativistic physics, or Lamarckian evolution to the Darwinian kind -- it is rare that they attempt to link these individual shifts to a wider movement.

That capacity is now in question. Rethinking capitalism through the pulsing and renewing dialectic of humanity-in-nature, Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis. Capitalism in the Web of Life shows how the critique of capitalism-in-nature--rather than capitalism and nature--is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead.
