For this reason, it is important to be aware of and question addiction theories. The therapist who told my friend's mother that she caused her son's drinking was influenced by psychoanalysis....

What Causes Addiction? | Psychology Today
Get Access. In attempting to explain why people become dependent on drugs, theories tend to emphasize either psychobiological or psychosocial approaches. Psychobiological approaches include both neurobiological and genetic explanations of addictive behaviour. Psychosocial approaches focus on explanations that involve learning models and individual differences, usually while taking into account the cultural and environmental factors that make drug dependence more likely.

Theories of addiction: Causes and maintenance of addiction ...
They are organized into sections on genetic theories (inherited mechanisms that cause or predispose people to be addicted), metabolic theories (biological, cellular adaptation to chronic exposure to drugs), conditioning theories (built on the idea of the cumulative reinforcement from drugs or other activities), and adaptation theories (those exploring the social and psychological functions performed by drug effects).

Theories of addiction | What is the meaning of addiction?
In the past, addiction was viewed as stemming from an individual's moral failing and weakness of will (NIH, 2010). With the advances in scientific research, biological theories of addiction as a "brain disease" are now widely accepted; however, this point of view is still controversial. Many prefer to characterize it as a condition that requires continued management, rather than a disease, as it promotes the idea that addiction can be managed through behavioral changes and that the ...

They are organized into sections on genetic theories (inherited mechanisms that cause or predispose people to be addicted), metabolic theories (biological, cellular adaptation to chronic exposure to drugs), conditioning theories (built on the idea of the cumulative reinforcement from drugs or other activities), and adaptation theories (those exploring the social and psychological functions performed by drug effects).

The Meaning of Addiction 3. Theories of Addiction
Biological Causes of Addiction. A. Tom Horvath, Ph.D., ABPP, Kaushik Misra, Ph.D., Amy K. Epner, Ph.D., and Galen Morgan Cooper, Ph.D. , edited by C. E. Zupanick, Psy.D. Biological models of addiction emphasize the importance of genetics and the biological forces of nature. These theories suggest that brain chemistry, brain structure, and genetic abnormalities cause human behavior.

Biological Causes of Addiction - Addictions
There are several causes of addiction, which includes biological, sociological, and psychological. The sociological causes of drug addiction focus on society as the main contributors to addiction and drug use. The society plays a significant role when individuals get into using drugs, and when individuals are trying to quit from using these drugs. If a community undertakes and encourages activities that compromise individuals' willingness to stop or avoid drug use and addiction, they then ...
