Commodities
Futures &
Commodities - CNBC
Each commodity
market has a
standard size, set by
the futures exchange
where it trades. As
commodities are often
bought and sold in
large amounts, the
contract size also
tends to be large.
Let's take gold as an

Get Free Trading

example. The contract size for gold futures is 100 troy ounces. So if gold is trading at \$1100 per troy ounce and you buy just one contract of it, your contract would be worth \$110,000 (1100×100 ounces).
