In 1926, Ramsey composed a long paper about truth and probability which looked at the effects of what he called “partial beliefs” —that is, of people’s judgments of probability. Ogden and I.A. Frank

modern theory of subjective probability. He showed how, under ideal conditions, people 's beliefs and desires can be measured by use of a betting method, and that given some intuitive principles of rational behaviour are accepted, a measure of our ' degrees of belief ' will satisfy the laws of probability.

The Philosophy of F.P. Ramsey | Nils-Eric Sahlin

Ramsey disagreed with this approach. In his article "Truth and Probability" (1926), he argued that there is a difference between the notions of probability in physics and in logic. For Ramsey, probability is not related
