UEFI Firmware Writers Guide - Intel

3.7.2 Drivers - EDK II UEFI Driver Writer's Guide 3.7.2

Drivers UEFI drivers are different from UEFI applications in that, unless there is an error returned from the driver's entry point, the driver stays resident in memory. The UEFI platform firmware, the boot manager, and UEFI applications may load drivers.

There are a lot of pieces to creating a fully-featured driver. Fortunately, Intel has recently released a series of resources as a part of the TianoCore's "Enabling Resources" page, including a (long delayed) Driver Writer's guide and the UEFI Driver Wizard, which creates driver skeleton for various types of UEFI drivers. Go check it out.

The UEFI firmware was the first code to execute on the Intel chip. In order to prevent attacks that physically attach to the firmware storage chip that stores UEFI firmware, Mac computers were re-architected starting in 2017 to root the trust in the UEFI firmware stored in the Apple T2 Security Chip. On these Mac computers, the root of trust for the UEFI firmware is specifically the T2 firmware.
