concerned about environmental health. It is an education for all of us.

Understanding Environmental Health: How We Live in the ...

Humans interact with the environment constantly. These interactions affect quality of life, years of healthy life lived, and health disparities. The World Health Organization (WHO) defines environment, as it relates to health, as “ all the physical, chemical, and biological factors external to a person, and all the related behaviors. ” 1 Environmental health consists of preventing or controlling disease, injury, and disability related to the interactions between people and their environment.

The food we eat gives our bodies the "information" and materials they need to function properly. If we don't get the right information, our metabolic processes suffer and our health declines. If we get too much food, or food that gives our bodies the wrong instructions, we can become overweight, undernourished, and at risk for the development of diseases and conditions, such as arthritis ...
