Python pandas will read a csv file using utf-8 encoding defaultly.

However, if the character encoding of this csv file is not utf-8, UnicodeDecodeError may occur. How to fix this error? In this example, the character

Get Free

UnicodeDecodeError Utf8

encoding of csv file is cp936
(gbk).

~~Fix Python Pandas Read CSV File:
UnicodeDecodeError: 'utf ...~~
The error is because there is
some non-ascii character in the
dictionary and it can't be

Get Free

UnicodeDecodeError Utf8

encoded/decoded. One simple

way to avoid this error is to

encode such strings with encode

() function as follows (if a is the

string with non-ascii character):

```
a.encode('utf-8').strip()
```
