Picture of Urgos Grandfather Clock Movement Parts I  
thought it would be fun to show all the parts of this  
movement. In the first photo it has been disassembled  
and is ready for cleaning. You can tell it needs cleaning  
by the black deposits on the pivots (the ends of the  
gear shafts that turn in the holes in the brass  
movement plates).

The most important aspect of owning a grandfather clock is to take care of the grandfather clock movements. Generally, due to the different types of clocks available, finding the cause of the problem can be confusing. The rules are completely different for grandfather clocks that are more than 50 years old. They are classified as antiques.

This section is for Weight Driven Clocks Westminster or other 15 Minute melodies not chiming the hour, on the hour. If the clock is chiming prematurely only about 5 minutes or so before it is supposed to chime, on most clocks you can just take off the minute hand and turn the bushing that is in the center of the hand one way or another so it is exactly on the hour when it bongs its melodies.
