## Answer Key

copy of viral DNA. This can go on for a long time. Something (usually stress) causes the viral DNA to come out of the cells chromosome and proceed to the lytic cycle.

---

Biology - Virus Lytic Cycle Flashcards | Quizlet

Process Of Lytic Cycle. The burst time is calculated from the time the phage is attached to the cell till the lysis of the host cell and release of new phages. The total burst time is about 20-40 minutes. The number of viruses that are released from the

# Access Free Virus Lytic Cycle Gizmo Answer Key

cell at the burst time is called burst size.  
The burst size can vary from 50-200 phages.
