HYFRA offers you a wide range of powerful air- and water-cooled chiller units with multiple equipment options that can be customized to satisfy your needs. Thanks to sector-leading HYFRA microchannel technology, our chiller solutions are highly efficient and deliver significant energy savings. And they use up to 60% less refrigerant.

Product Overview: HYFRA Chiller Units | HYFRA

The proven HYFRA Sigma series for cooling water recooling is equipped with high-efficiency plate heat exchangers making it the ideal industrial water chiller for various applications. In combination with sector-leading HYFRA microchannel technology, the refrigerant used is reduced by up to 70 % in comparison to conventional machines.

Industrial Water Chiller: Highly Efficient Machines | HYFRA

The small water chiller series HYFRA eChilly stands for high performance in small spaces. Its compact design allows the models to be integrated into almost any machine layout. HYFRA eChilly cooling systems can be shipped with a variety of equipment options, including a water-cooled variant.

Small Water Chiller: Compact Industrial Units | HYFRA

The HYFRA Alpha series was developed as a stand-alone solution for recirculation cooling with water, oil and emulsions. It is mainly used in filtration technology. These recirculating chillers are equipped with high-power pumps featuring flow monitoring. At an

Where To Download Water Chiller Hyfra

adequate input pressure level, they keep the refrigerant in circulation.

Recirculating Chiller: Circulating Water Cooler | HYFRA Hyfra SVK Chillers (Air Cooled Chillers/ Industrial Chillers/ Packaged Chillers) with a capacity 25kW, operating with eco friendly refrigerant, factory tested prior to despatch and incorporate all the necessary components for a quick and easy installation. Standard equipment incorporates the following criteria:
